VELO-KING

CHILDREN'S VEHICLES

Here Is The Line For You This Spring

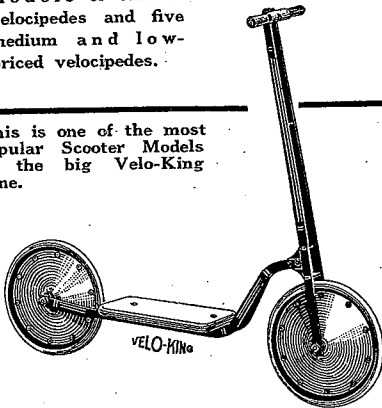

The Velo-King Line is so handsomely and durably constructed and boasts of such an interesting array of exclusive features that it merits your consideration before you place your Spring wheel goods order.

Velo-King Vehicles have built up an enviable reputation on sheer quality. All we ask is a chance to let our merchandise tell our story. We will gladly mail you our catalogue or a few samples.

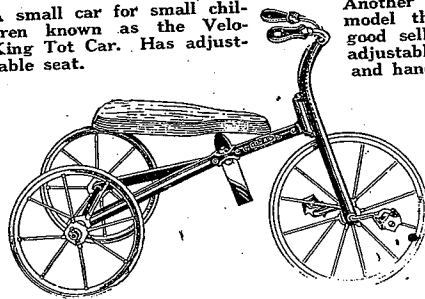

Velo-King Velocipedes abound in features that make for long wear and easy riding. There are 3 different models of tubular velocipedes and five medium and low-priced velocipedes.

Something
Really
NEW

VELO-KING
WALKING
Pull-Toys

Non-Mechanical
Pull-Toys that

WALK
RUN
and
WADDLE

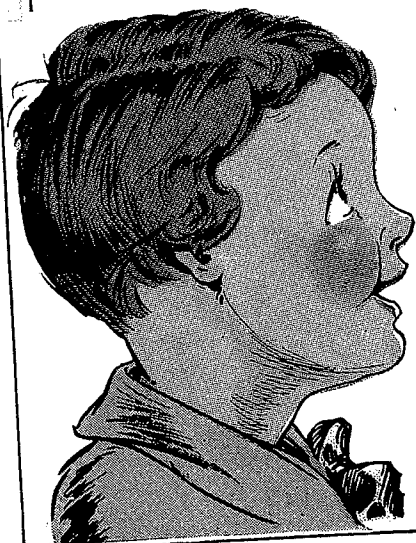

Here's **"SAMBO"**
—with a laugh in every step

SAMBO is the first model of the new line of Velo-King Walking Pull-Toys.

We could go into details about these toys; their ingenious foot-construction, a protected patented feature which permits them to walk, run and waddle in a most interesting natural way simply by being pulled along—but a thousand words of description would not equal one look at SAMBO in action.

So send for a sample box of six SAMBOS (in individual cartons) and get familiar with this season's greatest and most unique non-mechanical toy.

SAMBO is sturdily made to withstand a youngster's rough usage. As he walks he is twelve and one-quarter inches ($12\frac{1}{4}$ ") tall, nine inches (9") across and together with his cart, fifteen inches (15") in length. The cart has steel wheels six inches (6") in diameter. SAMBO is smartly colored as shown—in fact, SAMBO is a smart colored gentleman.
