WOO-OO-WEE-WOO-O-WEE

PEPKE MODEL TOYS. It was in 1946 that the first del Toy was introduced. In the few years that have passed since, Model Toys have become recognized throughout America for their exceptional quality, irresistible appeal and superb functional play features. These toys are true working models of familiar equipment. They offer the kind of realism demanded by youngsters "who know."

-AMERICAN-LAFRANCE AERIAL LADDER TRUCK. is authorized reproduction of the famous American-France Aerial Ladder Truck is constructed of heavy gauge steel and aluminum. The 6 die-cast wheels are made with famous-mk rubber tires. Details are amazingly true, even to the diamond-tread, non-skid running boards and ladder base. Sealing ladders, operating siren, bell and mock searchlight are standard equipment. Ladder lifts and extends by thumb-crew action; front wheels steerable. Overall length, 42", overall height, 42". \$14.95*.

-UNIT CRANE. Adjustable outriggers and jacks enable crane to lift astounding weights, just like the real Unit Mobile Crane. Cab swings in full circle. Tanks control boom, hook and clam shell. Solid steel with die-cast, steerable wheels and Goodyear tires. Overall length, 19½". \$12.95*.

-BUCKET LOADER. Modeled after the well-known Rubber-Greene High Capacity Bucket Loader. 18" high heavy gauge steel, with caterpillar treads and chain drive. Buckets collect gravel, etc., then dump and automatically into spout. \$11.95*.

-EUCLID TRUCK. 27" all-steel scale model of the great Euclid Bottom-dump Hauler. Hand lever control dumping; tractor detaches. Rubber tires, steerable front wheels. Has many unusual play features and is built to withstand normal abuse. \$12.95*.

-ROAD GRADER. Authorized scale reproduction of the giant Adams Diesel Road Grader. Solid steel with idem mounted wheels, 3-way adjustable scraper blade that turns in a 90° arc, and Goodyear tires. This exciting toy measures 26" long, \$12.95*.

*Prices Approximate—See Page Four

Pages Twenty-eight and Twenty-nine

F, G, H—ELECTRIC REMOTE CONTROL SCALE MODEL VEHICLES. These toys start, stop, reverse, and steer by remote control from a distance up to 6 ft. Constructed of durable Tenite with metal chassis and rubber-tired wheels, they are powered by a 5-pole enclosed electric motor with double end drive and spring action control

switch, operated with ordinary flashlight batteries. All cars are built to 1/25th actual scale size, in true detail. There are a Ford Custom Sedan, Plymouth Deluxe Sedan and Studebaker Starlite Coupe, each priced at \$6.95*. (The same cars, driven by special integral key-wind clock-spring motors available at \$2.00* each.)

STRUCTO

MANUFACTURING COMPANY

STRUCTO "LIVE-ACTION" TOYS are built for service. Among their many outstanding features are die-cast aluminum cabs and chassis, heavy-gauge stamped steel bodies, genuine rubber tires and high gloss, chip resistant baked enamel finishes. Additional realism is afforded by raisable hoods which reveal imitation motors on many of these models.

A, B, C, D, E. (A—Machinery Truck.) Has removable loading skid, crank operated winch with steel chain and 6 rubber wheels. 12¾" long, \$2.19*. (B—Utility Truck.) Bucket raised by crank, top opens automatically, allowing bucket to dump. Truck also dumps. Raised hood reveals "motor". 21½" long, \$5.49*. (C—Steel Cargo Trailer.) Has retractable landing gear, floating tandem duels and reinforced trailer. 14 rubber wheels. 20¾" long, \$4.39*. (D—Mechanical Hi-Lift Dump Truck.) Also operates as pull toy. Sturdy clock-spring motor and brake. Dump body raises by crank. Front wheels adjustable. 12½" long, \$3.23*. (E—Machinery Truck and Steam Shovel.) Same truck as item "A". Cab on Steam Shovel revolves and crank controls automatic unloading. \$5.49*. (Shovel only, 21½" long, \$2.98*.)

LIONEL ACCESSORIES... GIVE REALISM TO YOUR MODEL RAILROAD

No. 151

Scores of realistic Lionel accessories enable you to add to your model railroad from time to time, expanding it and making it more true to life with every addition. Ask your dealer to show you all the exciting new Lionel accessories.

No. 456

No. 397

No. 252

No. 145

No. 310

No. 151 Automatic Semaphore 4.95

When train is near blade is upright, and bulls-eye glows green. After last car passes, blade drops to horizontal position, and red danger light glows. Colorful, and handsomely detailed.

No. 310 Billboard Frames, Set of 5 for 1.00

Authentic outdoor billboard frames, designed to hold colorful advertising panels. Set furnished with each purchase. Place them all around your layout for realism.

No. 456 Operating Coal Ramp and Operating Hopper Car 15.95

Here's exciting fun. Back your train up the ramp. The hopper car

couples, and by remote control you uncouple your train from the car and run it to a siding. By pressing another button the bottom of the Hopper car opens and the coal dumps to the waiting bin. A third button releases the empty Hopper car, and it rolls down the ramp to couple on the waiting train. All sturdily constructed and magnificently detailed throughout.

No. 397 Diesel Type Operating Coal Loader 11.95

This Lionel loader can be placed anywhere on the layout — no sidings are necessary. Realistic artificial coal is fed to rubber end-less conveyor belt by clever vibrating mechanism. The coal is carried up the belt and emptied into waiting car. (Hopper car and

track section is NOT furnished with No. 397.) Included with accessory are controller and bag of artificial coal.

No. 145 Illuminated Automatic Gateman 5.95

Exciting action every time the train goes by. As the speeding train nears, door opens automatically and gateman rushes out swinging red lantern. After train passes, he goes back into his shack.

No. 252 Crossing Gate 3.25

This automatic gate lowers at the approach of the train, and raises when the train has passed. Correctly proportioned lamp on gate arm glows red.

Lionel "Q27" Three Car Freight
with Smoke 19.95

No. 1461S is a wonderful train set. Boys! power plus. The loco is a magnificent 2-4 engine, that puffs realistic smoke. Comp gondola car, box car, and caboose, toge 3 sections straight track, 8 sections of curv and remote control track section. Also in the Lionel 1011 Transformer, lockon, 1 track clips, and instruction booklet.

No. 1461S

No. 1469WS

TRACTON

"Magne-Traction" is new, and exclusive with Lionel. It gives more power, more grade-climbing ability, and higher speeds without derailling on the curves. Every Lionel train in 1950 is equipped with "Magne-Traction".

No. 2173WS

Lionel "027" Four Car Freight with Smoke and Built-in Whistle 39.95
469WS features a massive, powerful engine, a wealth of detail. Famous 2-6-4 type with KE and built-in remote control whistle. There hopper car, oil tank car, gondola car, and ase. Complete with Lionel No. 1032 90 watt former, 8 sections curved track, 3 of straight remote control track section, lockon, lubricant clips, and instruction booklet.

Lionel "0" Gauge Four Car Freight with Smoke and Built-in Whistle 52.50
No. 2173WS is powered by the Lionel Penn R.R. Steam Turbine Loco — 20 wheels of great power, supplemented, as is every Lionel Engine, by "Magne-Traction". This set is almost 56 inches long. It consists of Loco and Tender, Milk Car and Platform (the milk man pushes the cans out on the platform at the touch of a remote control button), Oil car, remote control operating coal dump car, and illuminated Caboose. There are 8 sections curved track, 7 sections straight track, and UCS remote control track section; also lockon, lubricant, track clips, and instruction booklet.

BOYS! EVERY LIONEL TRAIN IS NOW EQUIPPED WITH MAGNE-TRACTON

- ★ Giving added power to your Locomotives.
- ★ Enabling you to pull longer lines of cars.
- ★ Increased grade-climbing ability.
- ★ Much higher speeds without derailling on the curves.

With "Magne-Traction" you can do at scale speeds what even the great locomotives on the real railroads cannot do. You can run your trains at far higher scale speeds without derailling on the curves. You can climb steeper grades — why a Lionel Locomotive and tender will climb a 20% grade with ease.

"Magne-Traction" is Sensational! See it demonstrated at your dealers. Get a new Lionel Train this year equipped with "Magne-Traction" and watch the wonderful things you can do with it. Now you can build pikes with grades up, which your Lionel will roll with the greatest ease. And as for "sporting" your train at a given stop — it is easy with "Magne-Traction".

Lionel Trains have EVERYTHING ELSE that makes for realistic railroading. Smoke—Built-in Whistle—Real R.R. Remote Control Knuckle couplers, solid steel wheels, die cast trucks, and the most perfect scale detailing.
