Eight Centuries of Wood Processing at HEROS-Rossberg BRICKS YOU CAN BUILD ON

The Bavarian Forest has not only been an inspiration to German writers, musicians, and artists, since the 14th century it has also been the home of the Hermann Rossberg company (HEROS) where the processing of wood was part of the daily business from the beginning on.

The success story of HEROS wooden toys started already more than 100 years ago. Founded in 1866 by Mr. Carl Rossberg the company is now one of the leading wooden toy manufacturers in Europe. Children around the world know and enjoy our classic HEROS wooden toys that engage the mind and stretch the imagination.

Many awards, among them the highly prestigious rating "VERY GOOD" by the consumer magazine "ÖKO-Test" ("eco-test") have confirmed the product quality of Germany's leading manufacturer of wooden toys.

What makes HEROS toys so special?

We think it is because they are "home grown" in our own forests where only the finest beech and maple hardwoods are selected and then aged for at least a year for durability and strength.

To assure consistent quality we have developed highly sophisticated machinery to carve and triple sand the wood into a variety of smooth, pleasing shapes. Moreover, HEROS toys never fade, chip or peel. The bright colours are super lacquered and - even more important - they are safe and non-toxic. Our exemplary working practices are confirmed in regular tests by outside institutes and of course all our products are conform with the extensive requirements of European standard "EN 71".

Our aim is to offer our customers outstanding products of the highest quality at attractive prices.

HEROS toys can be found in children's rooms all over the world. For over 100 years our building blocks, vehicles, and ball runs have been helping children with their physical and mental development. The natural material of wood combined with attractive colours and designs suited to children's age groups is ideal for promoting motor skills and intellectual capacities of toddlers.

Yesterday, today and tomorrow for the world of children!!!
